Ghaziabad, Uttar Pradesh – India, 201005

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (2027 batch) with hands-on experience building full-stack web applications using React and Django REST APIs. Proficient in designing scalable relational database schemas (MySQL), writing optimised SQL queries, and managing codebases with Git branching workflows. Quick learner with demonstrated ability to adopt new frameworks and deliver functional products independently. Eager to contribute to a fast-moving product team building eCommerce and SaaS platforms.

EXPERIENCE

- Edunet Foundation – Virtual Internship**  July 2025
AI/ML Trainee
 - Independently built and deployed a full-stack web application from scratch, covering requirements analysis, algorithm design, coding, debugging, and deployment.
 - Developed a multi-class image classification system in Python (TensorFlow/MobileNetV2); resolved performance bugs iteratively to achieve 90%+ accuracy.
 - Used Git for version control throughout the project lifecycle with milestone-based, structured code reviews.

EDUCATION

- Maharishi Markandeshwar University (MM(DU))** 2023 – 2027
Bachelor of Technology in Computer Science and Engineering Ambala, Haryana
 - CGPA:** 8.2/10

PROJECTS

- AutoInsight AI – Full-Stack Data Analytics Platform (Group Project)** 2025 
Tech Stack: React, Django REST Framework, MySQL, Supabase, Git
 - Designed and implemented a scalable RESTful API backend with Django REST Framework, handling structured analytics requests with low-latency responses using optimised SQL joins and indexing.
 - Built a responsive React frontend that consumed REST APIs to render interactive dashboards, demonstrating end-to-end full-stack development across the React-Django stack.
 - Modelled relational database schemas in MySQL and wrote complex SQL queries (joins, aggregations, indexing) to serve analytics data efficiently to the frontend.
 - Coordinated parallel development in a team using Git branching workflows (feature branches, pull requests, merge conflict resolution) following Agile-style iterative delivery.
- Smart Leads Dashboard – Production-Grade MERN SaaS Application** 2026 
Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, Docker, TailwindCSS
 - Built and deployed a production-grade Lead Management SaaS with strict TypeScript architecture, JWT authentication, bcrypt password hashing, and Role-Based Access Control (Admin/Sales) via secure middleware.
 - Developed advanced lead filtering, debounced search, backend pagination, sorting, and CSV export using scalable MongoDB query patterns and aggregation pipelines for dashboard analytics.
 - Dockerized the complete full-stack application using Docker Compose; deployed frontend and backend separately on Vercel and Render with MongoDB Atlas integration.
 - Implemented centralised error handling, validation middleware, and a responsive SaaS-style UI with reusable component-based frontend design.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, Java
- Frontend:** React (hooks, REST API integration), NextJS (basics), HTML/CSS
- Backend:** Django REST Framework, Node.js/Express, RESTful API design
- Databases & Storage:** MySQL (schema design, complex queries, indexing), Supabase (PostgreSQL)
- DevOps & Tools:** Git & GitHub (branching, PRs, merge workflows), Docker (containerisation), Linux CLI
- Cloud & Infrastructure:** Supabase (cloud-hosted Postgres), basic familiarity with cloud deployment concepts (AWS/Azure)
- Algorithms & Data Structures:** Arrays, Linked Lists, Stack, Queue, Trees, Sorting, Searching
- Core Strengths:** Scalable API design, Debugging, Agile collaboration, Self-driven, Fast learner

CERTIFICATIONS

- Principles of Generative AI Certification** May 2025
- Frontend Web Developer Certification – Infosys Springboard** May 2025
- Oracle Certified AI Foundations Associate** Oct 2025

ACHIEVEMENTS

- Finalist – Hackchrono (48 Hours Hackathon, Chandigarh University, Mohali)** 2025
- Finalist – Internal Smart India Hackathon (SIH) 2025** 2025
- Hackureka Hackathon (GDSC, 2025)** 2025
